

Summary of Trade Mark Application 1218295

This is a database extract of the above trade mark application as submitted by the applicant (or their agent) on 31 August 2022. This extract is for reference only and confers no intellectual property rights.

Trade Mark Details:

Number: 1218295 Submission date: 31 August 2022
International Filing date: 31 August 2022
number:

Client reference: 1320

Mark nature: Trade Mark
Mark type: Word

Word: CLIMATECH ZERO
Images:

Marks in series: N/A

Use statement: The mark is being used or proposed to be used, by the applicant or with his/her consent, in relation to the goods/services

Convention Priority Details (Priority date, country, application number):

Specification of goods and/or services:

9: Computer software; application software; downloadable software applications (apps); computer hardware; remote control apparatus; electronic sensors; electronic monitoring systems; electronic control apparatus; telemetry apparatus; data processing equipment; computer software and hardware in the fields of environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting, and circular economy; computer software featuring data and information in relation to environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting and circular economy; computer software and hardware for collecting, organising, analysing and reporting data from industrial equipment, resources and processes; computer software and hardware for monitoring, managing, controlling, tracking, forecasting and analysing activity of industrial equipment, resources and processes; computer software and hardware for measuring and monitoring carbon emissions; computer software and hardware for carbon accounting.

35: Business consultancy, advisory and information services; business consultancy, advisory and information services in relation to environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting and circular economy; industrial management consultancy, advisory and information services; industrial management consultancy, advisory and information services in relation to environmental sustainability, resource and energy efficiency, clean energy,

decarbonisation, carbon offsetting and circular economy; business project management; business auditing; procurement services for others (purchasing goods and services for other businesses); collection of data; publication of educational and training materials; publication of news.

36: Project financing; arranging of finance for projects for environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting and circular economy purposes; consultancy, advisory and information services in relation to financing of projects; consultancy, advisory and information services in relation to financing of projects for environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting and circular economy purposes.

37: Management of building and construction projects; management of building and construction projects for environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting and circular economy purposes; consultancy, advisory and information services related to building and construction projects; consultancy, advisory and information services related to building and construction projects for environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting and circular economy purposes; building and construction; building and construction for environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting and circular economy purposes; maintenance and repair of buildings; installation, maintenance and repair of industrial equipment; installation, maintenance and repair of equipment for environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting and circular economy; installation, maintenance and repair of computer hardware.

40: Carbon offsetting services (recycling); providing information about processing and treatment of materials for environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting and circular economy purposes.

41: Training and education; training and education in relation to environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting and circular economy; providing online electronic publications, not downloadable.

42: Provision of online non-downloadable software; provision of online non-downloadable software in the fields of environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting and circular economy; provision of online non-downloadable software featuring data and information in relation to environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting and circular economy; provision of online non-downloadable software for collecting, organising, analysing and reporting data from industrial equipment, resources and processes; provision of online non-downloadable software for monitoring, managing, controlling, tracking, forecasting and analysing activity of industrial equipment, resources and processes; provision of online non-downloadable software for measuring and monitoring carbon emissions; provision of online non-downloadable software for carbon accounting; provision of information technology that allows users to enter, access, and synthesise information and generate reports via an interactive website; consultancy, advisory and information services in the fields of environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting and circular economy; strategic research consultancy services for reducing carbon emissions; scientific and technical research in the fields of environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting and circular economy; conducting scientific and technical projects in the fields of environmental sustainability, resource and energy efficiency, clean energy, decarbonisation, carbon offsetting and circular economy; industrial research; industrial design; environmental impact assessment services; quality audits; energy audits;

certification services (testing, verification and authentication of the goods of others for the purpose of certification); engineering services; engineering consultancy, advisory and information services; design services; design consultancy, advisory and information services; design and development of computer hardware and software; computer support services (software installation, maintenance and repair services); computer support services (software advisory and information services); updating of computer software; rental of computer software; technological consultancy, advisory and information services.
